Ramiro Bergoglio
Full Stack Developer

About me

I am a fourth year computer science student. I am currently working as a Full Stack Developer at Exxonmobil. I am always looking for opportunities to develop professionally and improve my performance as a programmer. I consider myself an analytical, decisive person with great capacity for teamwork.

- Azure
- Agile

Languages

English: Advanced
Spanish: Native

Academic formation

2025 - *Bachelor's Degree in Information Technology Management* - Universidad Argentina de la Empresa

PROFESIONAL EXPERIENCE

- **ExxonMobil** *(August 2016 – present)*
  - Full Stack Developer *(August 2022 – present)*
    - Entitlement Engine developer: To automate the creation of entitlements. Entitlements are advanced firewall rules used in SDP. I participate in the development of three internal applications using React (Frontend). FastAPI, for integration with other APIs (Backend). Flask, powershell and SQL, for maintenance and automation. (Backend)
    - Knowledge of CI/CD with azure pipelines for deployment and github actions. Openshift.
    - Organization of events to develop the technical skills of ExxonMobil employees.
    - Mentoring of new team members

  - Internet Hosting Analyst *(April 2020 – August 2022)*
    - Design, maintenance and upgrades of VMs for SDP (Software Defined Perimeter, is a security platform that serves as a more secure replacement for traditional VPNs).
    - Use of automation tools such as Ansible, Powershell and Python to increase productivity, for example: performing appliance deployments or backups with Ansible.
    - Maintenance and design of Windows servers hosted on VMware using agile methodologies. PowerCLI.

  - Internet Hosting trainee *(July 2019 – April 2020)*
    - Assist in the maintenance and design of Windows servers in the DMZ (demilitarized zone).
    - Internal customer service and ticket management.
    - Study of incidents through the use of analysis tools. (PowerBI, Python)
